## Hollow knight hornet 2 guide

in: Bosses (Hollow Knight), Enemies (Hollow Knight)
For playful silksong protagonists see: Hornet (Silksong)
Hornet
Hornet Protector
Hornet Sentinel
Skilled protector of Hollownest's ruins. Wields needle and thread. I saw this agile little creature. I thought her prey and pounced on her, but with a flash stung me with her flying stinger and darted me away. Could she be... Hunter?
The Hornet Sentinel is the hornet's second form as the boss in Hollow Knight. She challenges the knight at the entrance to Cast-Off Shell in Kingdom's Edge to test their determination and strength in saving Hollownest. This time he's using his full strength and tools. Unlocking a journal entry requires defeat and once in protector and sentinel formats or defeating it twice in Godhome. Hornet Sentinel's behavior and tactics use tactics similar to its protective form, but its attacks come at a much faster pace. The range of areas of impact on her Gossamer Storm attack is also higher. Her baseline attacks remain: Lunge: Hornet sails forward with a needle in front of him. Air Lunge: The hornet leaps into the air before aiming at Knight and hurtling down. Gossamer Storm: Hornet unleashes an attack on the self-centered effect area, using its thread to slice at anything around it. This attack can be carried out in the air. Throw: Hornet throws her needle forward, then pulls it back. The range of this attack is slightly less than the width of the battlefield. A needle can damage a Knight on his way back. Jump: The hornet jumps to move inside the arena. Running: Hornets working to move inside the arena. In addition, she gets two new ones: Parry: Hornet keeps his pin in a defensive stance, blocking every incoming attack. If she kicks while defending, she will giggle before unleashing a wide range of counter slash. Spike: Hornet uses its thread to suspend spike balls in the air. Spikes deal with damage to contact and remain until they are destroyed by nail attacks or spells. Only a maximum of 6 traps can be set at a time. Hornet uses this attack only after reaching 480 hp. Stagger Values Description: Hornet Sentinel leans in and pauses, breathing heavily. Hits: 13 Stagger Limit: 999 Combo: 7 Combo Time: &lt;2s per hit Poletan over it while sailing is a typically safe move, and using Desolate Dive/Descending Dark prevents a knight from damaging himself while being thrown. Having a Quick Focus and/or Soul Catcher/Soul Eater is useful because it allows more opportunities to treat or recharge SOUL. Using Great Slash is effective due to the fact that the Hornet rarely stays in one place long enough to get more than one or two standard nail kicks in. One strategy is to use Quick Slash, Lifeblood Heart, Grubsong and Stalwart Shell Charms, then repeatedly attack the Hornet as they tank its attacks and focus on healing whenever it staggers. Godmaster Content Hornet SentinelHall of Gods text: I keep an eye out for lush paths and remote GravesChrist protector of a country that fades pantheon pantheon of sage, locked by default Health 800 1200 Arena changes Arena seems to be about the same size, no difficulty difference. Dream Nail dialogue in Kingdom's Edge: Where do you draw that power from? Can it work? Is it strong enough? For god's sake... Do they watch us fight?. If you're chasing my dreams... Or am I yours? Little Spirit... What dreams do we share... The Hornet Sentinel location can be fought in Kingdom's Edge. GalleryHornet after being defeatedHornet Sentinel Radiant (Hitless) Hollow Knight Achievements (S) Proof of determination to defeat hornets in the kingdom of Edge Trivia After defeating the Hornet Sentinel, if a knight uses the Nail of his dreams on her before talking to her, they get SOUL as if she were still the enemy. The names of her hornet protector and Hornet Sentinel bosses were coined in Godmaster, before which it is commonly referred to simply hornet 1&amp;2. References ^ in Hornet Hunter's Journal: I saw this nimble little creature. I thought her prey came at her, but she stabbed me with a flash with her flying stinger and gave me away. ^ A tweet from Team Cherry Bosses (Hollow Knight) Enemies (Hollow Knight) Español Italiano Polski Português Pycckos Community Content is available under CC-BY-SA unless otherwise stated. Hornet's boss at Hollow Knight. Bosses are special enemies who have their own arena, a large amount of health and various unique moves and abilities. You will need to perform more attacks such as using nail and nail art along with spells and abilities to defeat them. Some bosses are capable of entering a staggering state after landing numerous attacks on them. As soon as you come across the boss, his name will appear on the screen, the music will change to a boss combat theme, and usually, the paths that connect the arena will close or will be blocked leaving you with no choice but to confront these devastating and unique enemies. The skilled protector of Hollownest's ruin. Wields needle and thread. I saw this agile little creature. I thought her prey and pounced on her, but with a flash stung me with her flying stinger and darted me away. Could she be... Hunter? Hornet Location Hornet Rewards Hornet Strategies Hornet is one of the bosses you can encounter in the early part of the game, so don't underestimate it since it's an early boss who has increased his speed and has a short recovery time allowing her to carry out her attacks frequently. Whenever she's having a lung attack, take that opportunity to jump over it and put down a few punches to damage it and recover soul. Since you are in the early stages of the game, the only magic you may have acquired is The Vengeful Spirit, it is recommended that you use this magic whenever it executes its storm of attacking threads. In addition, take your time and try to consume your SOUL wisely both offensively and defensively. Counter Stage 1 Attack Lunge Hornet dashes and lunges with a needle on the ground. You can jump to avoid this attack by jumping on it. The aerial Lunge Hornet leaps into the air and charges a lung attack towards Knight at a 45-degree angle. Hornet plunges into attack at the last position Knight will be while she charges for air, use that opportunity to anticipate where she will land to avoid her attack. The Needle Throw Hornet throws its needle around mid-range and pulls it back with a thread attached to the eye of the needle. You can avoid this attack by jumping to the top of the nail plate and executing an attack down on the Hornet's needle to pogo off it. Keep in mind that the Knight can still take damage after contact with the needle and thread. Storm Thread Hornet unleashes an AOE attack where its thread swallows around it for a short period. She can carry out this attack both on the ground and in the air. You can easily avoid this because she telegraphs this attack in place. If you want to be aggressive, you can damage it using the Vengeful Spirit. The hornet is a mysterious princess, protector, guardian of Hollownest's ruins. She is a descendant of Queen Deepnest, the Beast of Herrah and Hollownest's pale king, her existence the result of a bargain her mother made with father Pale King to become a Dreamer only if the Pale King awarded her a child. After Hornet was born, mother and daughter only got a little time to spend together. She was then raised in Deepnest by weavers where she managed to survive The Contagion and the fall of the Kingdom of Hollownest. After being ready, she became patron and guardian of Hollownest's ruins where she fends off those who pose a threat and attempts to seek destruction that closes inside the black egg. Hornet Notes &amp; Trivia unlocks the Trophy/Test of Resolve achievement after defeating Hornet. Hornet is one of the NPC's helping Hollow Knight. Silksong. When you're a rookie, it's not always easy just to beat your boss for the first time. It's about learning to attack bosses and behavior. This guide will help you how to beat hornet.Hornet 1 can be located on the west side of the greampath near the s bachelor station. When you enter the arena, the dialogue tells you and the fight begins. But if you meet her a second time but you died on the first attempt, she'll fight you instead of dialogue. Hornet has 3 main attacks:1s that hornet can dash with his needle in 2 types of ways. She can only regularly dash when she points her needle towards the knight and makes a sound when she does it. It can jump into the air and makes a sound when attacking. She then points the needle at the knight and dashes down.2Hornet can throw her needle when at the end of the arena, her needle then returning to her like a grasping hook. This is telegraph when she makes Sound and goes into a throwing position before attacking.3Hornet can jump into the air and pause for a shield attack, it's also telegraphed when she billows her cloak in the air and does the attack. Use all the charms that can be used in combat as a soul catcher. It's a great way to go get your soul overtime if you're low on health. Speaking of health, there is a charm to the game where you can cure 2x as fast. It requires the defeat of the grü mother in order to do this. After you have defeated the hinge mother, go under the arena and die because your shade can float and as well as you can pogo on it. Once you do this, lead your shade to the building on the right where the salubra and pogo off your shade and make sure you have at least 800 or more geo to get a quick focus. Now, of course, this advice is for early play, but you can try it if you want. Using shade to skip where salubra is in a forgotten crossroads is a little useful for the boss of battle, but the charms she sells are expensive! If you want to use the shadow right away skip when you enter a forgotten intersection, don't do it now! You need to collect geo before you can go. Otherwise, you need to use shade to skip again and no one likes to die much. And another thing, you have to kill your shade when it got on the platform to buy charms for salubra. Salubra.
